

1. See if you can explain this one...

Two men play five games of chess. Each man wins the same number of games. There are no ties.

2. What is pronounced like a single letter, written with 3 letters, and most animals have two of them?

3. A man builds a rectangular house. All sides of the house are exposed to the south. A huge bear walks by. What color is the bear? Why?

4. What is the beginning of eternity, the end of time and space; the beginning of every end, and the end of every race?

5. What is lighter than a feather, but cannot be lifted?
